INSECT KILLER®
Dual Purpose Bug Zapper with LED Light
Owners Manual
IMPORTANT SAFETY INSTRUCTIONS

READ THE ENTIRE PRODUCT LABEL AND OWNERS MANUAL BEFORE USING

ELECTRIC SHOCK RISK – ONLY FOR DRY LOCATIONS

Thank you for choosing the PIC® Post Free Living Insect Killer bulb for your pest-free needs. Please read the instruction manual carefully to ensure use of this product complies with all safety regulations.

The PIC® Post Free Living Insect Killer bulb is a dual-purpose bug zapper and LED light compatible with most standard electrical sockets. The unit attracts a wide range of flying insects and a 1,400V zapping grid which kills them on contact. The zapper utilizes LED and blue UV light to draw in flying insects within an 855 square foot area. The bright 600 lumen LED is suitable for illuminating surrounding areas.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: — Reorient or relocate the receiving antenna. — Increase the separation between the equipment and receiver. — Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. — Consult the dealer or an experienced radio/TV technician for help.

INSTALLATION:
1. Turn the light switch OFF on the fixture you wish to install the product.
2. Remove the existing bulb.
3. Screw the product completely into the socket clockwise.

OPERATION:
The PIC® Post Free Living Insect Killer bulb can be used with most electrical sockets and is operated using the standard light switch already operating your light fixture. Additional equipment is not required.

The product has TWO operating modes –
1. Blue UV and bug-zapping with LED light
2. Blue UV and bug-zapping only

1. By flipping the switch ON, the bulb will operate in bug-zapping mode with both the blue UV light and LED light.
2. By flipping the light switch OFF then ON again within 1 second, the bulb will operate in bug-zapping mode with the blue UV light.

Note: This switch over function from mode 1 to mode 2 is only valid for 1 second after the switch is flipped from OFF to ON.

To turn the unit OFF, flip the electrical switch to the OFF position. When all lighting functions are off, you know the bug-zapping mode is off as well.

Product Information:
- Voltage: 120V
- Grid Voltage: 1,400V
- Luminous Flux: 600lm
- Lighting Power: 9W (=65W Standard)
- Frequency: 50-60Hz
- Protection Area: ~855 sq. ft.
