MOSQUITO & FLYING INSECT TRAP
Guaranteed to Attract & Kill
Owners Manual

IMPORTANT SAFETY INSTRUCTIONS

WARNING: When using electric appliances, basic precautions should always be followed, including the following:
• To disconnect, turn all controls to the off (“O”) position, then remove plug from outlet.
• Unplug from outlet when not in use and before servicing or cleaning.
• To reduce the risk of electrical shock, do not put appliance in water of other liquid.
• This appliance is provided with double insulation. Use only identical replacement parts.
• Connect only to a circuit that is protected by a ground-fault circuit-interrupter (GFCI).
See instruction for Servicing of Double-Insulated Appliances.
Input voltage: AC 120V–60Hz

INSTRUCTION FOR DOUBLE-INSULATED, CORD-CONNECTED APPLIANCES:
In a double-insulated appliance, two systems of insulation are provided instead of grounding. No grounding means is provided on a double-insulated appliance, nor should a means for grounding be added to the appliance. Servicing of a double-insulated appliance requires extreme care and knowledge of the system, and should be done only by qualified service personnel. Replacements parts for a double-insulated appliance must be identical to those parts in the appliance.

WARNING: When using electric appliances, basic precautions should always be followed. Including the following:
Please read these instructions before using the Mosquito and Flying Insect trap and keep for future reference.

1. Always turn unit off and disconnect plug before servicing, cleaning or changing bulb.
2. Do not position the unit near heat, gas, oil or other flammable materials.
3. To reduce the risk of injury, close supervision is necessary when an appliance is used near children.
4. Do not contact moving parts. Do not touch fan while in motion.
5. Only use attachments recommended or sold by the manufacturer.
6. To disconnect, turn all controls to the off (“O”) position, then remove plug from outlet.
7. Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
8. Unplug from outlet when not in use and before servicing or cleaning.
9. This appliance is equipped with double insulation. Use only identical replacement parts. See instructions for Double-Insulated, Cord Connected Appliances.
10. Never operate this product if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or if it has been dropped into water.
11. To Reduce the Risk of Electric Shock, this appliance has a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.
12. For household use only, outdoor use. Do Not Immers In Water
13. Do not insert fingers or any foreign objects into the unit while it is connected to an electrical outlet.
14. To reduce the risk of electrical shock, do not clean this product with water or liquid spray. Do not place where it can fall into water, or near flammable materials.
15. Do not abuse cord. Never carry or hang unit by cord or yank it to disconnect from receptacle. Keep cord away from heat, oil, or sharp edges.
16. Extension cords used with this product must be marked with suffix letters “W-A” and with a tag stating “Suitable for Use with Outdoor Appliances”.
17. Use only extension cords that have plug and receptacles that match the product plug. Replace or repair damaged cords.

INSTALLATIONS & OPERATION INSTRUCTIONS:
1. Unpack unit. Save carton for off-season storage (if needed).
2. If hanging the unit, place approximately 3-6 feet above the floor/ground level for optimal catch rate and easy access for cleaning. Unit can also be placed on the floor or ground. Attached hook allows for easy hanging, detachable legs can be inserted into ground or removed for ground application (perfect height for attracting mosquitoes)
3. Carefully pour 4 oz of water, fruit juice, or another insect attractant into the bait tray to help attract additional insects inside.
4. Plug cord into an outlet or UL listed extension cord as described in “IMPORTANT SAFETY INSTRUCTIONS.”
5. Push the power button located under top of trap to the on “I” position. The fan will power on and the trap will light up. For best catch results, leave unit on at all times, except when cleaning or servicing.
6. Catch rate activity is higher at night. For best catch results, keep the unit away for competing light sources. Intended for household use.
7. Place the unit at least 10 to 20 feet away from where people will be sitting.
8. This unit is all-weather resistant – designed for outdoor use.

CLEANING:
Frequent cleaning will prolong the life of the unit, ensure fire prevention and provide for more efficient operation.

1. Be sure to clean the unit once per week.
2. To clean, push the power button to the off “O” position. When the fan stops moving and the light is out, the unit is turned off. Unplug the unit.
3. For weekly cleaning, turn the bottom collection tray counter clockwise to remove.
4. For major cleaning, remove the two screws from the catch funnel to clean the inside. Once the cleaning process has been completed, align the screw holes to the catch funnel, replace and tighten the screws, and reattach the collection tray by turning clockwise.

HOW THE PIC® MOSQUITO & FLYING INSECT TRAP WORKS:
Flying insects are attracted to the unit by UV light. The powerful fan then pulls the insects in to the collection tray, trapping them until they dehydrate and die. The unique funnel design prevents insects from escaping, and increases the killing rate. The base can be removed, allowing the contents to be emptied into the trash.

Manufactured For:
PIC® Corporation
1101-1107 West Elizabeth Ave.
Linden, NJ 07036, USA

This device complies with Part 18 of the FCC Rules. Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate this device. Operation is subject to the following two conditions:
1. This equipment may not cause harmful interference.
2. This equipment must accept any interference received, including interference that may cause undesired operation.
