

# INSECT KILLER

## Dual Purpose Bug Zapper with LED Light

### Owners Manual IMPORTANT SAFETY INSTRUCTIONS

READ THE ENTIRE PRODUCT  
LABEL AND OWNERS MANUAL  
BEFORE USING

### ELECTRIC SHOCK RISK – ONLY FOR DRY LOCATIONS

Thank you for choosing The **PIC® Pest Free Living Insect Killer** bulb. Please read the instruction manual carefully to ensure use of this product complies with all safety regulations.

The **PIC® Pest Free Living Insect Killer** bulb is a dual-purpose bug zapper and LED light designed to discreetly kill bugs on contact from most standard light fixtures.

The product features blue UV light as well as a white LED light that illuminates the area. The inner electric grid kills flying insects on contact. New easy to clean catch tray slides out to discard accumulating debris.

This device complies with Part 15 of the FCC Rules. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

### INSTALLATION:

1. Turn the light switch **OFF** on the fixture you wish to install the product.
2. Remove the existing bulb.
3. Screw the product completely into the socket clockwise.

### OPERATION:

The **PIC® Pest Free Living Insect Killer** bulb is designed for use with standard household medium base (E26) light sockets and is controlled by using the standard light switch already operating your light fixture. Additional equipment is not required.

The product has **TWO** operating modes –

1. Blue UV and bug-zapping with a white LED light
2. Blue UV and bug-zapping only

1. By flipping the switch **ON**, the bulb will operate in bug-zapping mode with both the blue UV light and white LED light.

2. By flipping the light switch **OFF** then **ON** after a slight delay, the bulb will operate in bug-zapping mode with the blue UV light only.

To turn the unit **OFF**, flip the electrical switch to the **OFF** position.

To **REMOVE INSECTS** from the product, remove the bulb from the socket and allow to sit for 45 minutes to fully release the charge from the zapper.

Next, use your cleaning brush to gently clean any debris from the zapping grid.

Finally, grasp the catch tray tab and gently pull to remove, discarding debris.

**NOTICE:** Always operate the product with the catch tray inserted.

### PRODUCT INFORMATION:

- Voltage: 120V
- Grid Voltage: ~800V
- Luminous Flux: 195lm (For Decorative Purposes Only)
- Lighting Power: 3W
- Frequency: 60Hz

CATCH  
TRAY

**CAUTION – High Voltage, Keep out of Reach of Children**  
**CAUTION – High Voltage, disconnect before servicing.**
